

Building Blogs from scratch?

Posted by Teddyg1989 - 2010/09/25 17:05

Im Joining in the auto blogging movement but theres one problem.

I have the new 2.0 software but I dont know how to build blogs from scratch.

I have hosting and its unlimited but Have no idea where to start? :S

Those who're new to WordPress, I recommend you guys to read my guide at www.Blog4BigBucks.com

I wrote that a while ago, even before releasing this software so dont expect any references there. But I have given all details on how to set up a blog right from the domain name, step by step, with screen shots.

Regards,
Carty..

thanks I'll have a look at this however I suspect that if we're wanting to create blog after blog after blog then WP is a lot of effort & time consuming. Whereas using Blogger.com not only are they hosting for you but it should be much quicker to do?
