

What Is WP Syndicator - In Dummy Like Instructions

Posted by WebSolutions 4 All.co.uk - 2010/10/13 18:24

Hi,

I've seen on WebMagnates.org, a banner promoting WP Syndicator ...

I'm finding things a little overwhelming at the moment, reading absolutely loads on producing WP blogs, promoting them, writing articles etc ... and as such, I'm having a bit of trouble absorbing what WP Syndicator is actually about.

Can anyone explain to me in SIMPLE terms what this product is all about please ?

What does a 1 domain and 5 domain user lic. mean - does it mean I could have loads of blogs on one domain and it will be okay and if I have more domains, with loads of blogs on, I'd need the additional lic ?

Is it actual software or a kind of plugin ?

For promoting web sites and blogs, I've got RSS Bot, a Directory Submitter, an Article Submitter and IBP - does WP Syndicator promote in a different way to the methods I already use or does it submit to services I can't submit to using what I've already got ?

Oh, nearly forgot, I've also got Bookmarking Demon for the social bookmarking aspect.

Jane

I have not used it, but what it does is this:

It tells a lot of blog sites and social networks, that you just updated your content, that's all, and that's a lot of work doing it manually, It sounds like a good idea, but I will wait a little, I am too overwhelmed for so much information available.

Hope this helps

;)

Yes, I will be replacing the banner soon. I have used SEO Link Robot and it is way better in auto promotion or back link building. Check it out here ([aff link](#))

Regards,
Carty..
