

[Help/General] Blooger Accounts?

Posted by Byronwrites - 2010/08/04 01:48

Hello

Just so I'm clear: To keep yourself safe with the folks at Blogger create no more that 5-6 blogs per Account... not ISP or proxy or anysuch...simply Account. Is that correct?

So, I could follow the plan creating new accounts as I create new blogs and stay on the safe side?

Thanks for the great software and all the help.

Byron

That's correct. Blogger.com will also limit the maximum number of scheduled posts to 50. Once they get published, you can ofcourse add another 50 but if you choose WordPress, you get entire control over your blogs apart from a ton of SEO benefits.

Regards,
Carty..
