

## Wont post anything\!!

Posted by happysmiler2493@yahoo.co. - 2010/08/14 14:57

---

Hey all

I used this software yesterday and it worked fine. Ive added another blog today (wordpress) and it says its posted everything but its not, ive checked and there is nothing posted and there is nothing scheduled. I dont have onlywire either, please help, 7 hours on this!!

John

Dear John,

Some plug-ins like WP-O-Matic, Onlywire auto submit and a few more will prevent ABS to make posts. Can you please try deactivating some of your plug-ins temporarily and try posting again? Tell me how it goes.

If that does not help, please give me a temp login details to your blog (email Support CartyStudios.com) and I will check it here for you.

Regards,  
Carty..
