

Feeds Not Extracted Properly

Posted by Dexter - 2010/09/17 09:23

I planned to Host a Tamil based website and planned to extract some feeds from those sites, to my bad, Only the title was extracted Properly... and the contents were filled with " ???? ????? ???? ?? ????? " something like that... I really couldnt understand what is the Problem. Do Help me Carty!

Regards,
Raj

Raj, the software work only with Feeds having English alphabets. Can you email me an example feed url so I could check it out and see what I could do.

Regards,
Carty..
