

{HELP} I am trying test your ABS 2 demo vesion

Posted by hoto2011 - 2010/09/30 12:14

Hi, carty

With ABS 2 demo, i try to search images from flicker with my plr and upload them to blogger posts but i only see the articles without images.

So, i have some questions:

- With ABS 2, Can i upload flicker images or url to blogger directory without using FTP server feature?
- Why can't i download articles from ezine article? i try with ABS 2 demo.
- When i post article to blogger posts, there are 2 or 3 space when the end each paragraph.

So, i feel unhappy with your software if i purchase your software and still have a problem like this.

Thanks.

No. Blogger does not allow direct uploading of images. You need an FTP Server.

What keywords are you using for eZines?

That is an issue with PLR articles and it will be resolved in the next version.

Regards,
Carty..
