

Post Schedule Prob.

Posted by blogpstr - 2010/10/02 16:24

Hello,

I'm having problem with post schedule option. When i change the schedule to post randomly 1 to 3 days, it went back to post randomly 4320 to 7200 minutes. Any solution on this. Thanks.

The software converts the days to minutes and saves them for better randomization. Random numbers between 1-3 is not many but 1000-3000, there are a lot. That is why. You will still get the minimum and maximum time the same. Its just the way represented there as minutes rather than hours.

Regards,
Carty..

Hello carty,

Owh, ok. Thanks for the info.
