

[HELP] PROGRAM CRASH

Posted by ronyim78 - 2010/10/03 01:50

HELLO ALL,

I'm buy The Auto Blogging Software few days ago

I run the program and instal the net framework 3.5

then I run again the software It says the software is crash. Please help me

thanks

Rony, Please do the following

Open the software' install folder (C:Program FilesCartyStudios Corp.AutoBlog..)

Delete the folder named data there.

Download: <http://webmagnates.org/corporate/absfw/ABS-Update.zip>

Unzip the downloaded file and copy all contents to the install folder above, overwriting the files there.

Now open the software and tell me how it goes.

Carty,

I've followed your instructions but still can not.
still crashes

Rony,

Carty,

I only have antivirus software that I normally use,
but I also have tried to turn off antivirus and run a program that also can not

Rony

Rony, can you please email me: Support@CartyStudios.com

I will send you an error log to check out.

Regards,
Carty..

Carty,

I use a notebook acer 10 ", if this could make the software autoblog crash

Regards,
Rony..

Crash? When exactly does it happen?

Regards,
Carty..

Carty,

happened at that time I bought from you.

I mean maybe if I run the program there is an influence on the notebook 10 "

regards,

Rony

Not really. Does it still happen though?

Regards,

Carty..
