

System reboot - all blogs / feeds lost

Posted by gareththomasnz - 2010/10/03 10:21

This is a serious bug.

My system froze so I did a reboot with the app running. All blogs & feeds are gone now.

See the end of this message for details on invoking just-in-time (JIT) debugging instead of this dialog box.

***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Is there a way to recover the lists ?

If I had many blogs and feeds this would have me extremely angry.

Posted by gareththomasnz - 2010/10/04 22:41

so how do i recover my feeds / blogs ?

=====

Re: System reboot - all blogs / feeds lost

Posted by Carty - 2010/10/06 06:57

Can you send me the file MyBlogs.txt present inside the 'data' folder found inside your install directory (C:\Program Files\CartyStudios Corp.WebMag..) Before sending me the file, you may take a copy of it somewhere, open it, change passwords and then send me (if required :)).

Email: Owner CartyStudios.com

I have experience with this problem. i use ABS with blogger when i import my PRL to ABS. the software show me that scipt. this can be cause your blog title have spacial symbol such as: |. Example: Car | Car info. By remove the symbol, you can go.

Re:System reboot - all blogs / feeds lost

Posted by gareththomasnz - 2010/10/07 04:01

Well its completely blank

Can you cut & paste an example for me of what should be there. I can then fill the blanks and see it it works.

myblogcats has the data still in it & all the post & image files ate in the folder

I am hoping that MyBlogs.txt file didn't include the feeds too.

=====
Re:System reboot - all blogs / feeds lost

Posted by Carty - 2010/10/07 15:42

Yes, My Blogs.txt file includes the blogs, and feeds too. I'm sorry you may have to re-enter everything again.

Maybe you can create the index by filling in the blanks, roughly how many blogs and feeds have you added?

Regards,
Carty..

Re:System reboot - all blogs / feeds lost

Posted by gareththomasnz - 2010/10/07 22:48

One blog & five feeds - I see the feed sources are named in the post files.

I could just redo it all.

Maybe you should build in a backup of the data folder into windows my documents. So users can restore in an emergency.

Re: System reboot - all blogs / feeds lost

Posted by Carty - 2010/10/11 15:34

Yup, a backup and restoration of the data folder is on my next version' feature list already :)

Regards,
Carty..
