

Amazon and Clickbank ID's

Posted by Johntw - 2010/10/04 00:00

Is there a way to permanently change the Amazon and Clickbank IDs so it does not have to be changed each time? There must be a way to make the change since it has an ID (not mine) in there already; but the tools preferences tells me "All settings are pre-built in this version."?

It is very time consuming typing them in each time.
Thanks.

John, it will be available in my next minor update. Hopefully by next week or so.
