

Good Source of WP Plugins / Addins ?

Posted by WebSolutions 4 All.co.uk - 2010/10/08 18:26

Can anyone recommend any good WP plugins covering a variety of services ?

I'm after any that can be used for business style blogs and I'm also looking for plugins for all my SEO work and marketing of my blogs (prospective blogs).

Kind Regards

Jane

Eventually found a list of recommended plugins you state you use Carty but do you have any url's for me to visit and download these free resources ?

Also, is there any easy way to install them as my WP installation wasn't a manual process - well, not in the scheme of things as my hosting company provided a control panel to install WP of a sorts.

Regards

Jane

Once you have Wordpress installed you can do everything from within your Wordpress admin area, including installing and even editing themes and plug-ins.

You shouldn't need to go into your hosting account to administer your Wordpress site.
