

## ABS Problem Posting All Selected ?

Posted by WebSolutions 4 All.co.uk - 2010/10/10 19:10

---

After using ABS the past few days, after initially opening ABS up and updating the Amazon feed, I'm finding that when I select a number of items to post, the 'post all selected' option doesn't appear ...

To get that option to appear, I have to close down ABS and restart it again ...

Is anyone else having this issue ?

It always seems to happen after I've updated the Amazon feed and by the way, the feed update also seems to hang or stick ?

Hope someone can advise on this ...

Jane
