

## How to make it like this?

Posted by snoopy866 - 2010/04/10 02:41

---

When we use the wordpress

How to make the image link in the post from other site change to local host.(auto download the image to local host.)

I think it is better.

In case of WordPress, the software will automatically upload the image to your blog so no need of providing additional FTP information :)

Regards,  
Carty..
