

A function suggestion ?

Posted by snoopy866 - 2010/04/12 04:24

I do not know if you use the linkfarmevolution . There is a function to grab the pic from the flicker base on the kewword

Yes, I will be adding that feature within the software too.

Regards,
Carty..

A function suggestion ? - embedding links

Posted by rob24hrs - 2010/04/13 07:40

one more...

bloghatter has a usefull function that will replace a word ie "forex" with a link to a url..ie an affiliate link...that would be really usefull once content has been harvested or plr uploaded.

even better would be ability to upload a LISt of say 10 keywords....and ten urls and have software assign a random link toi on of the keywords.

rgds

Rob

Yup, I'm planning to get that replace function + keywords to cashlinks type of function within the software. But before that I must get this WYSIWYG editor done :)

Regards,
Carty..

While you are at it please add the button so we do not have to add it manually in source mode.

Thank you
