

adding new blog from blogger

Posted by stunmedia - 2010/11/04 18:49

when trying to add a new blog from blogger, after entering my blogger account name and password:

1. the drop down list does not contain my blogs created.

can you please allow more blogs to appear in the drop down list?

I am using an older blogger account, before reading your instructions to only make 5-7 blogs per account. My blogs on this blogger account have all original content, written by me, and should not be flagged or removed.

conclusion:

please allow the total list of all blogs from a blogger account to appear on the drop down list.

thanks

It is a limitation by Blogger to which I have no control over :(

Regards,
Carty..
