I get the following message:

Sorry, I could not read the content from this page. Sorry, I could not read the content from this page.

Video where I show the message I get:

<http://www.youtube.com/watch?v=4AJ6hyJEdHk>

I can do to make it work?

The proprietary methods of extraction cannot work on a few sites which would result in this error. You may try the second method 'Between a known location' and it should work in these cases.
