I would translate every time, for sure. You need unique content and translating is the surest way to get that outside of re-writing everything which defeats the purpose of auto blogging.

Try translating (auto-detect to Spanish and back to English)

Plus knock down your MAX posts to 10 or 15 from the default 25. I got a Google warning when using the 25 so I dropped it to 10.

But, translating is the way to go.

thanks kinddd for your sharing... usually i download from ezine until 40 articles without translating. and posting the article. that's why i always get banned with my blog or wordpress.

If you pay for your own hosting you won't get banned.

Hostgator allows you to host an unlimited number of sites for about \$10 per month.

Other good hosting companies are BlueHost and JustHost - all offer unlimited sites for around the same price.

Yes, get your own hosting which isn't expensive either and gives you total control over your sites.
