

Auto Blogging Software Scheduling Question

Posted by hoyce - 2011/01/10 03:18

Hey Guys,

I've watched the videos and read the manual and I can't seem to get how the scheduler works. I uploaded 3 PLR's to test on Blogger. With a schedule of 2 posts per day. ABS just says "posting plr articles for" and it never finishes - im scared if I close the software it wont post. When I log in to Blogger - there is nothing there.

Ok, also if I do not "check" the items in the "feed item title" is it still going to post according to schedule?

Or do I need to check them and then press "post to blog" - I did that on a word press and they turned off my "posting ability".. .

Basically, I want this piece of 8hit to post twice per day to a blog - thats it. I have it set that way in the "minutes/hours" section, but what do I need to do in the "feed" section to make that happen, so far it doesn't do anything or it posts everything.

=====
