\*\*\*\*\* JIT Debugging \*\*\*\*\*

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

When exactly do you get this error?

Regards,  
Carty..

---

when I click on the help menu today, and something else yesterday, I not really concern with that it is that I cannot do anything with the software I can give you access so you can see what it does nothing no article feeds, not amazon, or clickbank feeds. no rss feeds, and no article directory feeds, I really need to get this working, I am running windows 7 ultimate. I had to reinstall in everyday the last 3 days do to the

fact when I open it for the first time everyday hoping it might work, it just gives me a icon on my taskbar and if I click again it tells me that it is already running, or if you want I can to a camtasia video on the steps I am doing to get it to work.

---

Please open the software' install folder (C:Program FilesCartyStudios Corp.WebMag..)

Delete the file named Settings.txt there

Now open the software and tell me if it opens fine.

Regards,  
Carty..

cobrawho ,

i think you have some problem with your window or something is not rite about your window.

my suggestion is plzz re-install back your windows.and try to install abs back.if you afraid you,u can mail to Nick.
