

Autoblogging to Pages and Posts

Posted by jolinsz - 2011/01/30 16:33

Hi Carty,

I have had your autoblogging software for a while but just recently started to use it because of frustration with autoblogging plugins for wordpress. I like the fact that I have control over what is autoblogged, instead of blindly having plugins posts and then I check my blog to only find missed posts and garbled content because the plugin went haywire. Do you know if you are planning to have your autoblog software post to pages as well as post in wordpress? This would be the ultimate autoblogging software if it could. Thanks B)

Yes, this feature is 100% confirmed on the next update.

Regards,
Carty..
