

Auto Blogging Software update feed

Posted by punpy - 2011/03/13 14:18

Hello i testing the software but when i try ti updatr the feeds it dosent work. to making work i have to re-intall the feed;

by othe hand why some feed dont display the content?

How lon can i test the software?

Best regard.

all the feeds that i have, and the version that i using is 2.0.

Other question why when i try to use some conten the have the ??? signal in the content?

The ??? appear when a language having non-english alphabets or unicode characters used.

Please open the software' install folder (C:Program FilesCartyStudios Corp.WebMag..) and delete the folder named 'Data' there.

Now open the software and it should start fresh. Press the button that says 'Click here to begin' and then

proceed to add a blog and feeds.

Now tell me if they update fine.

Regards,
Carty..
