

Problems with some feeds, pls help!

Posted by oyedepo1 - 2011/04/21 09:49

Hello,

I got ABS working but not with all feeds. Some feeds worked perfectly but most of fetch articles are having problems.

Some feeds only brings out summary of the articles while some just bring out only the title of the articles.

Pls what can I do?

What version of the software are you using?

Regards,
Carty..

Version 1 has old algorithms which wont work on some websites. Version 2 has better feed fetching methods and supposed to work on most sites.

Version 1 is free but Version 2 isn't.

Regards,
Carty..
