

Bug: First post is not posted (Blogger.com Blogs)

Posted by TomTaser - 2010/04/17 04:32

Hey Carty,

found a bug in your software. It's easy to reconstruct:

- open autoblogger.
- choose a post from a feed and post it to a blogger.com blog, either by marking it and pressing post, or pressing the post button directly.
- the post doesnt appear.
- however, all posts which i select to post now will appear.

hope i've helped you.

tom

Dear Tom,

This happened just once for you or every time you add a new feed?

Regards,
Carty..

Ok, I will look into this asap and will update you.

Regards,
Carty..
