

## Sorry, I could not read the content fromt this pag

Posted by neilmckay - 2011/05/07 12:24

---

So far anything I had a problem with or didn't understand fully was solved simply by re-reading the ABS manual. However, I seem to be stuck at the moment.

When I select from the list in the top panel the article does'nt appear in the lower panel. I get this message

"Sorry, I could not read the content fromt this page."

Can anyone tell me what I do next, what I missed?

Thanks.

This happens on a few blogs where the text to image ratio is too low or there's very less content on the blog. Please try a different feed and it should work.

Regards,  
Carty..
