

[Help] Noob question here. Help appreciated...

Posted by bobbydean - 2011/05/11 09:27

Okay. I want to schedule 3 post a day. I set it at randomly at 1440 mins to 4750 mins? or randomly post at 1 to 1 days? (still unsure about this, post between x and x days = 3 post/day) ???? :huh:

Any ideas?

try setting it between 1 to 8 hrs , then you will get 1 post at random between those hours, and 3 posts within 24hrs or 1 day as you wanted

You should check your blog' dashboard and see if the posts were actually scheduled to be published on future dates.

Regards,
Carty..
