

Ezine Articles are Empty HELP

Posted by FrankGredau - 2011/06/10 06:37

Hello,

when i add an new Blog and want to add Text from Ezine the Software is Downloading and translating but the shown Articles are all Empty!

Have someone an Solution for this?

Need Help!

No Support here?

No Idea from Support?

I had the same Problem with Senuke. They have fixed that in new Version.

Please Update your Software too!!!

Yes, eZine articles changed their site layout. I will fix in the software and send you an update in a week.

Regards,

Carty..

Re:Ezinearticles.com download limit might have bee

Posted by aasuccess - 2011/07/08 23:03

I have two different blogs both with 25 ezine feeds each, i.e i have downloaded 50 articles.

I have added another blog and when i ask the software to download more articles a dialouge pops up saying:

Re:Ezinearticles.com download limit might have been reached today! Please try again later - WTF!

Seriously cant be telling me that there is a limit to downloading articles, whats goin to happen when i have 25 blogs all wanting article feeds.....

Is anyone else having this problem, and how can i resolve??

Have updated but no luck as yet....

Are you getting this when you update ALL feeds? If you update one by one this wont happen.

Hi, - thanks for the reply,

yes Im only updating the one article feed.....

I have even closed the software down and re-loaded the next day, and still same problem....

What settings do I need to check - please help

If they figure this out I might be able to tell Auto Blog Samurai that I have been dealing with this for a couple months now, All my blogs are dying...No help, just keep telling me to reinstall, at least Auto Blog Software is working, I had to download a demo version of Auto Blog Software to get any sort of automation, the only thing now is I have to take the watermark off each post . This is getting old, but I am at the mercy of the vendor. My scenario is: it downloads the title only, no content, so in other words the bottom is blank...

what's up with this issue?

just installed new blog with new ezine link and when updating feed I could se the articles in the topwindow but zero in the bottom window.

next I tried to post to blog and that looked ok but when checking the blog I only had the titles of these articles which seems logical given the above display/load issue (se attached screenshot)

so what 's the latest on this?

This error is fixed already and a free update was issued to my customers.

If you're using Auto Blog Samurai by any chance, please contact your vendor for support. Email: Support@AutoBlogSamurai.com

Regards,
Carty..
