

Trouble connecting ABS

Posted by hursty01 - 2011/07/10 14:58

Hello,

I have just purchased this software and I am having significant trouble setting this up. When i try to connect to my blogger account it provides me with the error:

<http://img52.imageshack.us/img52/7110/blofu.jpg>

Uploaded with ImageShack.us

I have tried changing password and tried with a different account but get the same message.

With Wordpress, i get an error returned stating the the server cannot return valid xml. I have checked the setting to ensure xml-rcs is on but no avail.

Any ideas?

Thanks!

Tom
