

ABS hangs on: "Uploading images.." (WORKED BEFORE!

Posted by proline - 2011/07/16 12:52

Hi,

Just wanted to update one of my blogs (Only have two at the moment running with ABS)

First did the first one, now i want the second one to update. Changed some stuff etc, when i hit post marked to blog. ABS hangs on "uploading images: "Post title"

What is this problem? It's a wordpress blog, worked before. Nothing changed!

please help.

Apologies for the slight delay in response.

Was your blog password changed recently?

Please open the install folder of the software (C:\Program Files\CartyStudios Corp\WebMag..)

Create an empty text file there named 'ErrLog'

Now open the software, make some posts, see if they get posted and if not, close software, open this text file and see if the software has written anything onto it and send it to me so I could verify where exactly it gets stuck.

PS: For quicker response, please email me directly.

Regards,
Carty..
