

Microsoft translator error??

Posted by bagusp - 2011/07/30 03:29

hi,

so weird that everytime i update feed there is sentences like this

There was no endpoint listening at http://api.microsofttranslator.com/v1/Soap.svc that could accept the message. This is often caused by an incorrect address or SOAP action. See InnerException, if present, for more details. There was no endpoint listening at http://api.microsofttranslator.com/v1/Soap.svc that could accept the message. This is often caused by an incorrect address or SOAP action. See InnerException, if present, for more details.

what happen? anybody here got same issue?
