

Never ending grabbing images

Posted by memo_399 - 2011/09/13 10:19

Hello guys

good day

I have a problem with the auto blogging software

I was using the free version 1 of the software

then i had the grabbing images
when i try to fetch the feeds
It keeps saying grabbing images for hours
and nothing changes
i tried different feeds
but it is still as it is

those are the feeds i'm trying to load

<http://feeds.ezinearticles.com/category/Travel-and-Leisure:Hotels-Accommodations.xml>
<http://feeds.ezinearticles.com/category/Self-Improvement.xml>
<http://www.bing.com/search?q=%22advanced%20driving%20tips%20%09%22%20site%3Aarticlecity.com%2Farticles%20intitle%3Aby&format=rss>
and many other feeds

Taking into consider that it was loading normally until last week

so i thought that the problem is with version 1 so i upgraded to version 2 DEMO version
but the problem still as it is

so please give me a solution for this

thanks in advance

Can you try a re-install to a different drive other than C: and tell me if it works fine?

Regards,
Carty..

Yes the software can grab feeds now

But all my old projects gone

do i have to start all over again???

Yes. You could try moving over the data folder from old location to new and see if that helps.

Regards,
Carty..
