

## The Best Spinner - Now Integrated with ABS

Posted by Carty - 2011/10/26 08:11

---

Greetings from the creator of the Most Powerful Auto Blogging Software.

I have now integrated the software to work with The Best Spinner, which means your content will be re-written automatically if you choose to.

In case if you didn't know, Best Spinner is a software that spins or re-writes articles based on synonyms. It costs you just \$7 initially, then \$77 a year. In my personal experience, it really is the BEST Spinner out there and is worth every penny you pay for.

Here's What You Need:

To use the new content re-write feature in the Auto Blogging Software, you will need 2 things:

1. The latest version 2.0 Build 585 of the Auto Blogging Software.

Note: If you have purchased the software before, simply open it up and it should prompt you with a free auto upgrade.

2. A Best Spinner account

You can sign-up here (affiliate link)

Instructions:

-Open the Auto Blogging Software

-From the top menu, choose 'Tools' and select 'Best Spinner Settings'

-Enter your Best Spinner Username/Email and Password

-Press 'Save'

-Now, every time you add a new feed or edit an old one, you will find an option next to content translation where it says 'Rewrite Using Best Spinner'. Simply check that box and every content from that particular feed will be automatically re-written.

If you have any questions, simply reply here and we will help you out.

Regards,

Carty..

Wow, this is really great. Two of my favorite tools combined! Thanks for continuing to not only maintain, but improve, ABS. :)

Hi, normally I am no friend of spinning articles since I almost never saw one that really was a pleasure to read. And if a living visitor comes to my blog I don't want to present him or she with content that has "computer-generated-text" written all over it.

But maybe I give it another try. Anyway, am I right that before I can submit an article to bestspinner it must be prepared in spintax?

Thanks,  
Demian

Thanks Nick ....The Best Spinner is also one of my favourite tools I use a lot..and adding it in here .....yippee

I'm not using auto blogging these days since Panda , but as ABS is very helpful for finding articles and uploading these when I want to, I can now get even more use out of it by spinning.

I'm finding that ABS is not updating to the latest version when I open it. Is there a link that I can access to upload it from.

hi Carty,

My software is an early version of the ABS because I bought it at a time when the ABS was first launched where there is no menu for auto upgrade ... how to get the the last version of the ABS with TBS were included, :( :( :(

thank you  
regards

I already use the v2, but after I upgrade to the build585 to use the TBS, my licensed is not working, its always ask a license key and use a demo version. I contact the support more than 3 times but the reply is the same.

Please download and install this version of software:

<http://absmainvid.s3.amazonaws.com/video/ABSsamuraiNew.zip>

You will need to uninstall the previous version before installing this new version.

Use this: xxxxxxxxxxxx@autoblogsamurai.com to access.

P.S. If you have any others questions, please read the FAQ page first, if the issue is not solved, please email us. This way all your questions will be answered immediately.

To be perfectly honest, your message sounds like spun content to me! :D  
For example, on the line: "I don't want to present him or she with content that has...."

him or she? Should be him or her right?

Pardon me. English is not my first language so cannot comment any further.

Bottom line is, your post made sense to me. I did have pleasure in reading it. LOL..!

Spun content is not horrible. Best Spinner has improved a lot and can rewrite content maybe a little better than how you've written too.

You dont have to give the text in spintext format or anything. The software is integrated in a way that the content is automatically re-written using TBS right after downloading from other sites.

No intervention is required on your part apart from turning it on.

Regards,  
Carty..

I tried many times to manual upgrade but the results is the same, the worst thing is, I emailed the support many times about the problem but they replied with the same answers. Now. I didn't use it, until I use the latest with TBS.

I bought the Abs through autoblogsamurai.com

So let me get this right. If you purchased Autoblogsamurai, you won't be able to upgrade with TheBestSpinner feature?

hi nick what is in abs version 586 2.0 public release

=====

## Re:The Best Spinner - Now Integrated with ABS

Posted by Carty - 2011/12/02 10:04

---

Thats right, if you have purchased Auto Blog Samurai, you wont get the upgrade. If you've purchased the original version from us, it includes free updates for life-time.

Duan, 586 update issued yesterday included the fix for Amazon API which was changed recently.

Regards,  
Carty..

thank nick for the quick reply bro,  
so how about my problem with the code inside the post that i post a thread here.  
i also email your the answer you want bro

Hi  
Now i am using the Auto Blogging Software,it is very powerful software, but I can not download pictures when I use the function "Rewrite Using Best Spinner API", can u help me how to deal with it?

thank u.

Posted by Carty - 2012/07/11 19:24

---

Are you sure the picture is downloaded if TBS turned off?

I'm thinking of integrating with Spin Rewriter instead of TBS. What do you say?

Regards,  
Carty..
