

ABS not pulling Amazon Products

Posted by KathyB - 2011/11/05 15:34

I read else where that Recently, Amazon changed the way that software applications need to access their API,
Would this be why I can no longer download products from Amazon.
If so please could you fix this ...soon. I use this feature alot.
Thanks

KathyB

Can you try adding a new blog and then a single Amazon feed, then tell me if it updates?

Regards,
Carty..

Thanks for replying Nick

I have just done that and still no uploading of Amazon products. In the bottom left corner where it reads the uploading It does a quick 'searching amazon" and then back to the 'downloading complete'
It was working fine until last week. I didn't do any changes.

And while I am here I also have found that the software isn't updating to the one with best spinner. Not so much of a problem seen as I have best spinner.
The Amazon products is more important.

thanks

Hi Nick,
I have the same problem - Created new blog and new amazon feed ran a fetch and nothing..

Regards

Nick

Just bought yesterday and having exact same problem.
I have made a post on Warrior forum listing problem.
