

## How to not get penalized by GOOGLE using Autoblog?

Ok guys. I'm new here, and I almost read all the topics about ABSoftware, also I've searched on google and found thousands of articles saying that google will penalize your autoblogs for duplicate content or spam. Is it true? I put all my hopes in this software, and I want to make it work. So my question is: how you can set up an auto-blog without getting penalized by GOOGLE?

Thank you very much! :)
