

Autoblog major problem!

Posted by Adriann22 - 2012/03/01 22:50

Hello again guys. I have a major problem with Autoblog software and maybe someone can help me. I open my software, I manage to connect to my blogger account and retrieve all the blogs, but once I hit the "Add blog" button, it gives me this error:

Unhandled exception has occurred in your application. If you click Continue, the application will ignore this error and attempt to continue. If you click Quit, the application will close immediately.

Illegal characters in path.

And after that, under Details tab, a lot of code. I've tried with Cotinue, I've reinstalled the software and it's the same error.

Can anyone help me pls? Thank you very much ! :)

I just found the problem of this error. The blog name/title must contains only words and period only.
