

## Using feed from Ezine Articles

Posted by nimsy - 2010/05/06 18:09

---

I want to use a feed from Ezine article but want to keep the resource box and article source links intact according to their TOS. How can I do this?

At the moment, using the between a known location method chosen while adding the feed, you can specify the software to include the resource box but the links are removed. Don't worry, in the next version you will have an option to leave out the links intact if required.

Regards,  
Carty..
