

Help with Auto Blogging Software please?

Posted by TheMeekGeek - 2012/07/01 18:44

I just installed a copy, and just loving it! I was able to post multiple feeds for my blog, <http://www.videogamersoasis.com/blog> - but lately, the software isn't letting me post anymore feeds - for Blogger or Wordpress.com/org - what gives?

Could you give me some step by step process in getting the feed link, inserting feed, labeling, and accessing the feed on my blog?

Lately it's taking a Turtle's age to wait for a blog feed to go through! Nothing lately. What am I doing wrong?

Thanks for your help :)

Jeremy

Dear jeremy,

If you have successfully posted once to your blogs, I don't think you need any more step-by-step instructions.

If it is not posting currently, can you tell me where exactly it gets stuck?

Regards,
Carty..

I just purchased your Auto Blogging Software... at first it was working good!

I have a website blog, <http://www.videogamersoasis.com/blog>

I was able to post my YouTube Channel as an RSS Feed.

Later, I attempted to post some more Video Game - Related RSS Feeds...

Lately, no new feeds from Auto Blogging Software have shown up!

I am at a loss for what I must do next!

Any helpful advice you could give me please? :S

Jeremy

Dear Jeremy,

"No new feeds have shown up!"

Can you please explain that? You're trying to update the already added feeds but they don't refresh or update or pull new articles?

Did you check the feed' source websites to see if there were any new articles published?

Regards,
Carty..

I have not used this software for a while and when I try to update to the latest version it says it updates but it really doesn't. It says I have Build 553 as my current version and that it will update to build 587. I have run the update several times now and I still have Build 553. Also this version does not post to my blog at all. Please advise ASAP

I would suggest you to try a clean install if you don't have too many blogs added. Latest version can be downloaded from here: <http://www.WebMagnates.org/ABS2.0.msi>

Regards,
Carty..

If you've purchased our original version, please contact us using the top menu link for a new key. If you have purchased a rebranded version such as Auto Blog Samurai, please contact your vendor for support.

Regards,
Carty..
