

## [Help] Can't get translate to work

Posted by kman - 2010/05/29 23:18

---

I can't seem to figure out how to get the translate feature to work. I have everything working with typical english feeds... but when I try to use a Foreign feed, I can't get it to translate.

Maybe I have the syntax wrong.

For example, lets say I have a German feed I'm trying to use and just want to translate it into English. What would I put in the translate setting/box?

auto-en

de-en

-en

-de

Thanks.

You can either use auto-en or de-en.

Regards,  
Carty..
